Nathaniel Suri   Spring 2020
Software Engineer - New England / Remote

I'm a storyteller, an innovator, a problem solver and a team player. I bring a unique and compassionate perspective to all the work that I do, and I can both design new systems and efficiently execute engineering tasks.

Work Experience

Wayfair, Software Engineer (June 2019 - Now)

I started at Wayfair as a new engineer learning the ropes but I quickly progresses and took on more responsibility, eventually creating designs for new systems; becoming an approved-reviewer for all JavaScript work in our department; and leading a technical book club on *Effective Python*.

General Assembly, Software Engineering Immersive (October 2019 - January 2020)

I developed and deployed three full stack web applications during a 12 week, 500hr software engineering bootcamp. This is where I gained the basic skills for software engineering and used these skills to land my engineering job at Wayfair.

Filmmaking Experience (May 2015 - October 2018)

In my previous career I worked as an editor and assistant editor in documentary film, corporate video, and network television. My roles in the film / tv industry groomed many of my communication skills, taught me how to work efficiently with breakneck deadlines, and how to work both independently and while on a team.

Programming Languages and Technologies

JavaScript . React . Redux . Node . Express . Jest . JQuery
Python . PHP . Ruby . Rails . Elixir
Kafka . Kubernetes . GraphQL
MYSQL . Mongo . PostgreSQL
HTML . CSS . Sass
Git . Github . Gitlab

Hobbies
Analog Photography . Piano . Keyboards . songwriting . Hiking & Camping
Cooking . Building a tiny house . CNC Router . Writing

Education
B.S. in Film & Television Boston University (2015)
